April 1, 1973

GRAIN AND OILSEED STOCKS BELOW A YEAR EARLIER

Stocks of the four feed grains (corn, oats, barley, and sorghum) on April 1, 1973 totaled 119.2 million tons, 6 percent below the 126.7 million tons in all positions a year earlier, according to the Crop Reporting Board. Oats and sorghum had the largest declines, 20 and 24 percent, respectively. Corn and barley were down 2 and 7 percent, respectively, from this time last year. Disappearance of feed grains during January-March amounted to 54.4 million tons, 10 percent more than the same quarter last year.

Wheat stocks were down 24 percent from a year earlier, the smallest April 1 stocks since 1968. Durum wheat holdings were also sharply lower but rye stocks totaled about the same as a year earlier.

Oilseed stocks were below April 1, 1972 with soybeans down 8 percent. Flaxseed stocks were only about one-third of a year earlier.

All wheat in storage April 1, 1973 totaled 923 million bushels, 24 percent below a year earlier and the lowest April 1 stocks since 1968. Off-farm stocks, at 607 million bushels, were 11 percent below April 1, 1972. Farm holdings of 316 million bushels were 40 percent below a year earlier and the lowest April 1 stocks since 1967. Disappearance from all storage positions for January-March is indicated at 473 million bushels, compared with 337 million in the comparable quarter a year earlier.

Durum wheat stocks in all positions totaled 73.1 million bushels April 1, 1973, down 27 percent from a year earlier and 7 percent below 2 years ago. Farm holdings of 50.3 million bushels were 33 percent below last year and off-farm stocks of 22.8 million were down 9 percent. Disappearance during January-March is indicated at 25.0 million bushels, compared with 19.0 million for the same quarter in 1972.

SPECIAL NOTE: Historical revisions of grain stocks, by States for the 1964-69 crop years were published in Statistical Bulletin 508, which is available upon request. The revised estimates for 1970 and 1971 crop years are shown in the January 1973 report and again in this report. Any corrections of the data published earlier for the 1970 and 1971 crop years are denoted by an "x" in this report.

This report also includes revised estimates, where neccessary, for the January 1, 1973 Stocks of Grain.

UNITED STATES DEPARTMENT OF AGRICULTURE
STATISTICAL REPORTING SERVICE CROP REPORTING BOARD
GrLg 11-1 (4-73) WASHINGTON, D.C. 20250

Rye stocks in all positions on April 1, 1973 totaled 49.1 million bushels, slightly less than a year earlier but 43 percent more than April 1, 1971 stocks. Farm holdings of 13.1 million bushels were 24 percent below last year while off-farm stocks increased 12 percent. Indicated disappearance during January-March was 5.0 million bushels, compared with 5.3 million bushels for the same period a year earlier.

Corn stored in all positions on April 1, 1973 totaled 3,329 million bushels, down nearly 2 percent from the 3,381 million bushels a year earlier but 31 percent more than April 1, 1971. Farm stocks, at 2,375 million bushels, were 4 percent less than a year ago while off-farm stocks, at 954 million bushels, were up 6 percent.

Disappearance from all storage positions during January-March is indicated at 1,486 million bushels, compared with 1,320 million bushels used in the same quarter a year ago.

Oats stored in all positions on April 1, 1973 totaled 586 million bushels, 20 percent below last year's record high and the lowest April 1 stocks since 1969. The 206 million bushels held off farms was 23 million bushels below last April 1. Farm stocks dropped 25 percent under a year earlier--from 507 million bushels to 380 million bushels, the smallest farm holdings for this date since 1968.

January-March disappearance was 194 million bushels, compared with 207 million bushels for the same quarter in 1972.

1/ INCLUDES STOCKS AT MILLS, ELEVATORS, WAREHOUSES, TERMINALS, PROCESSORS AND CCC-OWNED GRAIN AT BIN SITES.

(Continued from page 2)

Barley stocks in storage on April 1, 1973 totaled 263 million bushels, 7 percent less than a year earlier but 2 percent more than April 1, 1971. Farm holdings of 166 million bushels were the same as a year ago while off-farm stocks at 97 million bushels were down 18 percent.

Disappearance from all storage positions January-March 1973 was 99 million bushels, 9 percent less than for the same quarter in 1972.

Sorghum grain in storage April 1, 1973 totaled 366 million bushels, 114 million bushels below a year ago and 10 million bushels above April 1, 1971 holdings. Both farm and off-farm stocks are sharply below a year earlier. Farm holdings of 98 million bushels were down 32 percent; off-farm holdings of 268 million bushels were 20 percent below April 1, 1972 stocks.

Disappearance from all storage positions January-March was 262 million bushels, 14 percent more than used during the same quarter last year and about 3 percent more than the January-March 1971 total.

Soybeans in all positions totaled nearly 506 million bushels April 1, 1973, down 8 percent from a year earlier and the smallest for the date since 1967. At 147 million bushels, farm stocks were off 33 percent but off-farm stocks of 358 million bushels were up 7 percent from a year ago.

Stocks on April 1 indicated a September-March disappearance of 849 million bushels from a beginning supply of 1,355 million bushels (carryover of 72 million bushels plus the 1972 production of 1,283 million bushels). Disappearance for this period a year earlier was 722 million bushels. During the past 7 months, approximately 459 million bushels were processed for oil and about 338 million bushels were exported.

During January-March indicated disappearance amounted to 367 million bushels, 9 percent above a year earlier.

Flaxseed stocks in storage April 1, 1973 totaled 9.5 million bushels, 66 percent less than last spring and the lowest April 1 stocks since 1962. Both on-farm and off-farm stocks were down sharply from a year ago. Flaxseed stored off the farm accounted for nearly 7.6 million bushels, down 67 percent from a year ago. Farm stocks totaled 1.9 million bushels, 61 percent below a year ago and the smallest April 1 farm holdings recorded since the beginning of quarterly flaxseed stocks estimates in 1948.

Disappearance during January-March is indicated at 4.6 million bushels, compared with 7.0 million a year earlier. April 1 stocks indicate a 9-month disappearance of 24.5 million bushels from a supply of 34 million bushels. Reported disappearance during this 9-month period included about 14.6 million bushels crushed and 8.7 million bushels exported.

CROP REPORTING BOARD

Off-Farm Grain Storage Capacity

Capacity of off-farm commercial grain storage in the Nation totaled 5,810 million bushels on January 1, 1973, 2 percent greater than a year earlier. Increases were recorded in 28 States while 12 recorded declines.

Changes in most States were relatively small with Iowa, Illinois, and Louisiana showing the largest increases of 43, 32, and 12 million bushels, respectively. The largest decline of 8 million occurred in Texas.

Kansas moved ahead of Texas to rank first in storage capacity. The two States combined account for more than one-fourth of the Nation's total capacity. The next four ranking States--Illinois, Iowa, Nebraska, and Minnesota--have nearly one-third of the total capacity.

Capacity data, by States, include all elevators, warehouses, terminals, merchant mills, other storages, and oilseed crushers which store grain, flaxseed, or soybeans. Capacity data exclude CCC bins, warehouses used to store only rice or peanuts, oilseed crushers processing only cottonseed or peanuts, tobacco warehouses, seed warehouses, and storages that handle only dry beans or peas.

Capacity of Off-Farm Grain Storage Facilities, by States, January 1, 1973

State	Rated Off-Farm Storage Capacity		State	Rated Off-Farm Storage Capacity
